

Product Endorsement

Holstebro, Denmark
Vlaardingen, The Netherlands

April 2008

Subject: Product Endorsement

Vald. Birn A/S has machining centres from Hüller Hille since 1991. We are most satisfied with these machines, as they come up to our expectations to stability, reliability and performance. In the future we will be investing in more machinery from this supplier.

In our production we primarily use Cimstar products, a metalworking fluid from Cimcool. We are satisfied with this product, as it has a good resistance against bacteria and good lubrication characteristics in accordance with chip cutting. It is also very good for heat removal and protection against corrosion. Cimstar is a mild product which does not cause skin irritation.

Regards
Vald. Birn A/S
