## HERKULES Coolant Additive for Roll grinding Machine

To prevent corrosion and to improve surface quality of the roll depend highly on the correct maintenance of the coolant system. In our customers interest we recommend therefore to use the fluids indicated in this chart. Because of the different removal regulations of common law the suitable coolant fluids are to be selected by the user of the machine.

All these recommendations are exclusive of any responsibility, liability and any additional obligations on our part.

<b>Kühlmittelzusatz</b> Coolant fluid	r.meta TY 101 S	CIMTECH 10	Grindex 10
<b>Systemreiniger</b> Cleaning fluid	r.meta ZC 948	CIMCLEAN 50F	BLASOCLEAN B
